Appendix F:

REQUEST FOR RESEARCH ADVISOR

NPRE encourages new graduate students to approach faculty early in their studies to discuss research areas of interest. Graduate students should meet and get to know as many faculty as possible, even if those faculty seem to be involved in areas of research outside the students main interests.

List your first three choices for research advisor in the spaces below. Indicate if research assistant support was promised by faculty and if not list other sources of support or the date when support might be granted by faculty. Return this form to the Student Services Office, 219 Talbot Lab.

Student's Name: ______________________________ Date: ___________________________
